

Richmond Event Management Ltd

rem plan and run every type of event...

Carefully.
Creatively.
Meticulously.

Maybe the secret is little more than the years of experience or maybe it's an obsession with getting things right.

Richmond Event Management Ltd

**“No one can whistle a symphony.
It takes an orchestra to play it.”**

This portable profile offers a quick insight into Richmond Event Management (REM) - you can take it into meetings, pass it onto colleagues or file it until you need to talk to us.

Within the first three lines, you have already learned one very important fact about REM – we like to work in partnership with our clients, simply because we know a shared vision and co-ordinated effort achieves the best results.

Richmond Event Management is:

CREDIBLE

If you try and imagine how many companies and individuals are involved in event management and production in the UK, you may think it would be hard to stand out. It is - but we do - REM was awarded Event Organiser of the Year in 2006, 2007 and 2009 and Best Live Activity Award in 2007.

CREATIVE

Creative ideas are not always linked to big budgets, they are linked to passion, vision and finding out what exactly is the art of the possible.

Here's just a small selection of what we have created from corporate to corvettes to community.

Brunel 200 To celebrate the new lighting scheme for Clifton Bridge in Bristol and two hundred years of Isambard Kingdom Brunel, we created a live music stage, stunning pyrotechnic display and entertained 50,000 people. IKB would have been very proud.

Naming Ceremony for HMS Clyde on behalf of VT Shipbuilding

A high tech show for VIPs, VVIPs and guests featuring video projection, soundtrack, lasers, lighting, staging, special effects, pyrotechnics and The Royal Marines Band. At the heart of it all, a beautifully storyboarded, created and produced story of heroism, bravery and service.

A Victorian Festival of Christmas, Portsmouth Historic Dockyard

A strongly themed, ticketed event in the historic dockyard including a Christmas market, a cast of hundreds of Victorian characters, outdoor and indoor entertainment, Santa's grotto, parades, children's activities, carol concerts and a Spiegel tent. Approximate attendance: 30,000

company profile

introduction

Bristol International Balloon Fiesta Project, operational and site management for Europe's largest hot air balloon event. Over 250 exhibitors, traders and caterers along with 500,000 people

Danson Festival – Bexleyheath A free weekend community festival with numerous stages and a huge variety of entertainment and activities showcasing the best artistic and multicultural talents in the area. Approximate attendance: 70,000

The International Festival of the Sea Awarded 'Most Effective Event Activity – Marine or Aerospace' at The Event Awards 2006 - a four-day ticketed event in HM Naval Base Portsmouth featuring hundreds of visiting vessels including international navy ships and tall ships, 5 main live music stages, themed street entertainment, trade stands and exhibitions, involved the production of 33,000 high security access passes. Approximate attendance: 250,000.

Run Bristol Events Site management and procurement for the Bristol Half Marathon and 10k Races. 13,000 runners and major road closures in the heart of the city.

COMPETENT

Experience – over the past 16 years REM's experience in a variety of event formats has made us a market leader. We are not an agency; we don't subcontract large and important parts of the event to other firms. We have a core team of 8 and a wider team of experienced, loyal and dedicated freelancers. We do not work on a basis of open-ended time management and day rates, our costings and management fees are based on our understanding of what is required to ensure that whatever is needed is delivered effectively within the agreed budget and specifications. We assign a dedicated Project Manager for each event and this person works hand-in-hand with the client to ensure that the event meets all expectations.

CONCERNED

BS8901 is a British Standard specifically for the events industry and is designed to help us understand the sustainability issues surrounding our events and to put into place measures to control, document and minimise any negative impact. The standard will enable us to conduct our business in a more sustainable way via an established network of management best practice. BS8901 applies to the event management system that delivers the event and not to the event itself.

COMMUNICATIVE

Communication is important – we put a huge amount of emphasis on this. We believe it builds strong relationships, a feeling of security, trust and a healthy exchange of ideas and opinions.

The first step is to decide who gets what information and how often. The client sits at the top of the tree and we provide management reports detailing revenue, ticket sales, marketing activity, progress towards targets and everything else you need to know. This is backed by budget updates and a “traffic light” based report highlighting areas for action, areas that are becoming sensitive and areas that are proceeding well. You’ve guessed it – the colours are red, amber and green.

CANNY

Our position in the market adds quality and value to our supply chain management. We only work with the very best contractors, providing the best quality kit, at the right price and in the right quantity. Behind the scenes we vet all suppliers for appropriate accreditation and documentation.

CAREFUL

Operational Planning and Management – We work alongside our clients to ensure a competent path through the process of licence application, blue light liaison, SAG groups and traffic management. Central to this process is the development of our Event Safety Management Plan. We know what needs to go in it and what local authorities like to see from event organisers. Combined with your knowledge and detail of the event we are sure that we can pre-empt most issues and present a very robust set of arrangements.

CERTIFIED

In the very best way, of course! We carry Public Liability Insurance, Employers Liability Insurance, Plant Insurance and are members of the PSA and NOEA. REM are also accredited under the CHAS scheme (The Contractors Health and Safety Assessment Scheme) and Investors In People.

CALCULATING

If you want to know how big your site is, how many metres of fencing you need or where the stage should go, we have in house CAD software so you know how it’s going to look before you get there.

Contact
